

## DENTINE HYPERSENSITIVITY

toothpaste  
WITH A  
of glass

Dental Hypersensitivity can occur in around 40% of adults. Periodontal patients have a higher prevalence of up to 80%!

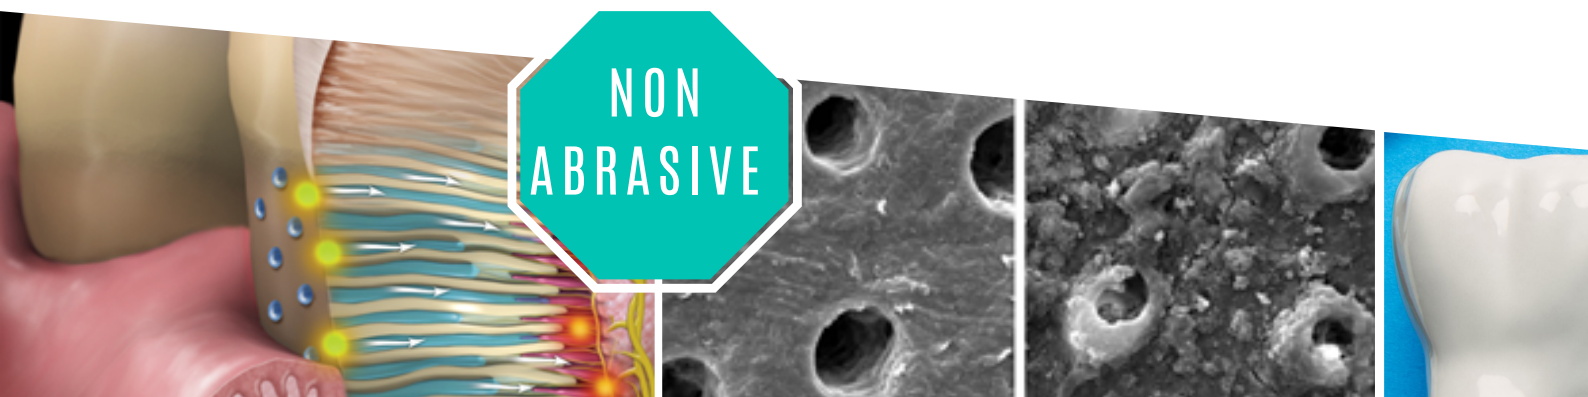

### *How to treat Dental Hypersensitivity ?*

#### **Introducing Biomin - Bioactive glass toothpaste**

- Contains Calcium, Phosphate & Fluoride within the bioglass.
- Allows prolonged delivery of Fluoride – up to 12 hours!
- The ratio of these three ions reflects the molecular formula of Fluorapatite, so the Phosphate concentration is 3 times that of NovaMin®.
- Bioglass particles adhere to hard tissue of the tooth and slowly dissolve in saliva releasing calcium, phosphate and fluoride creating fluorapatite to occlude dentinal tubules.
- Small particle size allows greater physical occlusion of open dentinal tubules.

**Instant. Bioactive  
protection. Forever**

## REASONS TO LOVE

- Relieve sensitivity
- Protect against early tooth decay
- Acid resistant

## REASONS TO BELIEVE

- BIOMIN technology
- Fluorapatite
- Small particle size

## ADDITIONAL BENEFITS

- Fluoride up to 12 hours
- No SLS
- Vegan & Halaal
