

HELLO, BABY!

QUICK GUIDE TO THE CURAPROX BABY RANGE

CURAPROX

 SWISS PREMIUM ORAL CARE

BIOFUNCTIONAL SOOTHER CALMS BABIES AND THEIR PARENTS

Biofunctional soother

- The ultimate orthodontic dummy.
- Supports the natural development of your baby's teeth, gums, palate and jaw.
- Ensures optimal nasal breathing.
- Natural breast sensation is mimicked therefore supporting the natural swallowing process.
- Developed by distinguished Dr Herbert Pick.
- Biofunctional.
- No harmful substances.
- For babies weighing 3-14 kilograms.
- 4 colours, 3 sizes.
- Free from harmful substances.
- No Bisphenol A (BPA), no Phthalate, no azo-dyes.
- With steriliser and transport box.
- Recommended accessory: Soother holder.

The flat tip helps to ensure the palate doesn't take on an abnormal, high-arched shape. This prevents teeth from moving and reduces problems with breathing, sleep and concentration.

The side wings guide the suction pressure to the jaw rather than the palate, ensuring the dental arch develops a nice, round shape... giving the milk teeth – which act as the placeholders for adult teeth – the space they need.

The special, soft silicone membrane creates the same, pleasant sensation as a natural nipple and supports the natural swallowing process.

Soothen holder

- Just click!
- It's simple and secure.
- It won't get lost.
- It's always there for your child.
